

TIER[®]

NATURAL STONE PANELIZED SYSTEM

NATURAL STONE. **MADE SIMPLE**

What is TIER® Natural Stone panelized system?

TIER® is a natural stone panelized system designed by experienced stone masons specifically to create a distinctive, natural stone finish wherever it is used.

The panels rise in interlocking 'tiers', fitting seamlessly together, eliminating the need for specialized labor and making TIER® a quick and easy system to use.

The product is made from natural stone and is available in a variety of finishes ranging from Traditional to Contemporary. The panels are ideal for both interior and exterior applications.

Why should you use TIER® Natural Stone panelized system?

AUTHENTIC, REAL, NATURAL STONE

TIER® Natural Stone panelized systems are made from natural stone, so it bears all the form and character of a traditional masonry wall. Part of what makes TIER® unique is that it has been designed and developed by professional stone masons. Only the highest quality natural stones are used to produce each TIER® panel. Each stone is carefully selected and dressed before use, so no two panels are the same.

Using natural limestone, slate, quartz, granite, basalt or sandstone our masons adhere to strict guidelines to create products with subtle color blends while maintaining traditional masonry methods to produce a consistent and authentic appearance.

The simple yet clever panel designs of our TIER® Panel System allows each section to interlock seamlessly together, producing all the charm and elegance of a natural stone surface.

SIMPLE, EFFICIENT INSTALLATION

This panelized system has been designed to achieve the look of a stone wall without the need for a qualified stone mason. No specialized skills are required to install TIER®, which is why it is popular with both contractors and developers alike.

TIER®'s modular design reduces the amount of time required to clad a wall in stone. With TIER®, it is possible to install up to 325 sq.ft. per day. This compares with 35 sq.ft. for traditional full bed masonry.

As well as reduced labour costs, TIER® has the advantage of producing less waste during construction. While traditional stone masonry can have up to 25% wastage, TIER® has virtually none.

QUALITY MANUFACTURER

Quality raw materials & attention to detail are just some of the reasons TIER® stone panels create such a unique, timeless and elegant finish.

All our products must pass stringent quality control procedures as well as meeting color variance guidelines. These standards ensure a high-quality product and result in a stunning finish on any application.

Along with all the added benefits of TIER® comes piece of mind. Such is our confidence in our products; TIER® Natural Stone panelized system comes with a 15 & 25-year warranty.

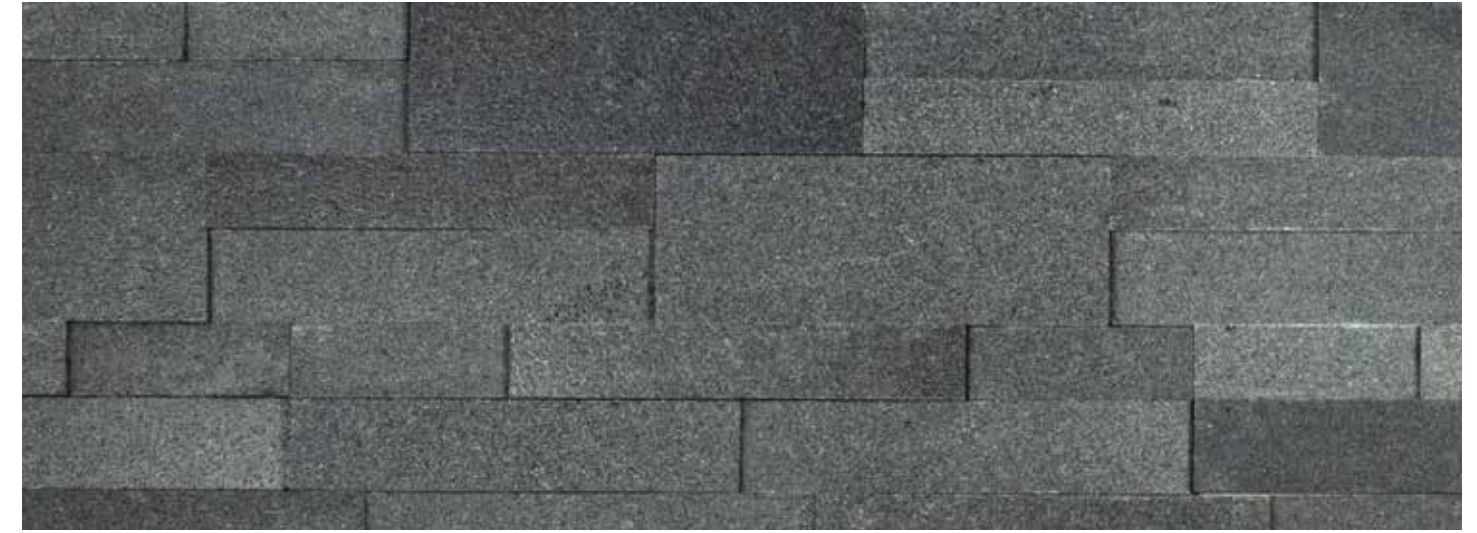

Featured Product - Grey Basalt, 3D

TIER® 3D is an ultra-modern panel that captures shadow and depth from its unique varied stone sizes.
